Korea Gas Spring

Compotek rappresenta la forza di un gruppo in grado di far nascere un progetto dalla richiesta del cliente, accompagnandolo fino alla realizzazione finale. Tutto questo con la possibilità di produrre nei propri stabilimenti componenti in plastica, legno e acciaio. Una sinergia che permette l'incontro fra il design, la qualità e l'innovazione nel rispetto dell'ambiente, dei suoi partner e collaboratori.

The strength of a group able to develop customized projects from the initial concept to the final product. Everything with the possibility to produce plastic, wooden and steel components in our own plants. A synergy that allows the intersection between design, quality, and innovation.

La fuerza de un grupo capaz de desarrollar proyectos personalizados desde el concepto inicial hasta el producto final. Todo con la posibilidad de producir componentes de plástico, madera y acero en nuestras propias plantas. Una sinergia que permite la intersección entre diseño, calidad e innovación.

Energia e passione.
Competenza e professionalità.
La CompoteK Srl vanta un'esperienza di oltre 30 anni nel settore del mobile.
L'azienda, fondata nel 1989, ha consolidato la sua attività guardando sempre al futuro e all'innovazione.

Energy and passion.
Skills and professionalism.
CompoteK Srl with their over 30 years of experience in the furniture industry being founded in 1989, have consolidated their position in the market always looking forward and to innovation.

Energía y pasión.
Competencia y profesionalismo.
CompoteK Srl cuenta con una experiencia de más de 30 años en el sector del mueble.
La empresa, fundada en 1989, ha consolidado su negocio mirando siempre al futuro ya la innovación.

Curvati in multistrato di faggio ed altre essenze per sedie casa, contract e ufficio.

Prowood, colonna portante del gruppo Compote^k è caratterizzata da una superficie di 12.000 mq e un team di 180 persone che fanno della Prowood una realtà in grado di vantare una produzione non solo efficiente ma anche di qualità di curvati, sedili e schienali destinati a tutto il mondo dell'arredo: una realtà che può vantare collaborazioni commerciali con i nomi più blasonati del mondo arredo casa, ufficio e contract.

La produzione annua di pannelli è di circa 2.000.000 di pezzi ed è sempre in continuo aumento.

A garanzia dei nostri prodotti vi sono delle strutturate procedure di controllo qualità e le certificazioni FSC e PEFC, che danno prova della nostra attenzione all'ambiente ed alla sostenibilità.

Curved beech plywood for contract & office chairs.

Prowood is based in Bosnia and is characterized by a surface area of 12,000 square meters and a team of 180 people who make Prowood a reality capable of producing curved panels, seats, and backs intended for the entire world of furniture: a reality that can boast commercial collaborations with the most renowned names in home, office, and contract furniture.

The annual panel production is about 2,000,000 pieces and is constantly increasing.

To guarantee the product, there are structured quality control procedures and FSC and PEFC certifications, which ensure our attention to the environment and sustainability.

Contrachapado de haya curvado para sillas contract y de oficina.

Prowood tiene su sede en Bosnia y se caracteriza por una superficie de 12.000 metros cuadrados y un equipo de 180 personas que hacen de Prowood una realidad capaz de producir paneles curvados, asientos y respaldos destinados a todo el mundo del mobiliario: una realidad que puede presumir de colaboraciones comerciales con los nombres más renombrados del mundo del mobiliario de hogar, oficina y contract.

La producción anual de paneles es de alrededor de 2.000.000 de piezas y está en constante aumento.

Para garantizar el producto, existen procedimientos estructurados de control de calidad y certificaciones FSC y PEFC, que aseguran nuestra atención al medio ambiente y la sostenibilidad.

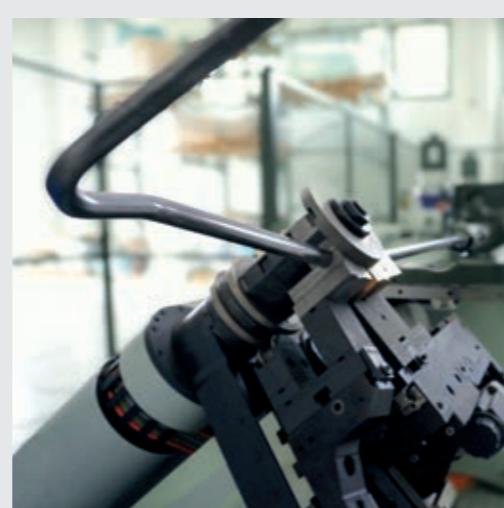

proSteel

Produzione di strutture e componenti metallici.

Al fine di poter sviluppare i prodotti in tutte le sue parti nasce Prosteel, con sede in Croazia, per tutto ciò che riguarda la lavorazione dell'acciaio. Produciamo telai a 4 gambe, cantilever, slitte in tondino e braccioli in acciaio.

Lavoriamo tubo sezione tonda, quadra e ovale e oltre ai telai presenti a catalogo è possibile sviluppare modelli richiesti su disegno del cliente.

I telai grezzi vengono poi sottoposti a verniciatura, cromatura o altre finiture, ed anche in questo caso è possibile con dei lotti stabiliti ottenere una verniciatura su richiesta.

Production of metal frames and components.

In order to develop products in all their parts, Prosteel was founded in Croatia, specializing in steel processing. Our production includes four-legged frames, cantilevers, wire sleds, and steel armrests.

We work with round, square, and oval tube sections. In addition to the frames in our catalog, we can develop models requested by the customer.

Raw frames are then subjected to painting, chrome plating, or other finishes, and in this case too, it is possible to obtain a custom finish with established batches.

Producción de metales marcos y componentes.

Con el fin de desarrollar productos en todas sus partes, nació Prosteel en Croacia, especializada en el procesamiento de acero. Producimos marcos de cuatro patas, patines, trineos de alambre y apoyabrazos de acero.

Trabajamos con secciones de tubo redondo, cuadrado y ovalado. Además de los marcos de nuestro catálogo, podemos desarrollar modelos solicitados por el cliente.

Los marcos en bruto luego se someten a pintura, cromado o otros acabados, y también en este caso es posible obtener un acabado personalizado con lotes establecidos.

Korea Gas Spring

Compoteck è distributore del marchio KGS per tutta l'europa /
Compoteck is the distributor of the KGS brand throughout Europe /
Compoteck es el distribuidor de la marca KGS en toda Europa.

Korea Gas Spring è sinonimo di affidabilità e serietà, leader nella produzione di pompe a gas persegue da sempre percorsi di miglioramento della qualità e del servizio sempre in linea con le richieste del cliente.

Una dimostrazione dell'attenzione dell'azienda alla qualità sono la certificazione ISO 9001, gli standard ANSI BIFMA per il mercato americano, nonché norme DIN per il mercato Europeo.

KGS vanta clienti in tutto il mondo che da anni possono confermare la serietà e la qualità che la contraddistingue da anni.

Korea Gas Spring is synonymous of reliability and professionalism, a leader in the production of gas lift. The company has always pursued paths of improving quality and service by always following the customer's requests.

An example of the company's attention to quality is the ISO 9001 certification, the ANSI BIFMA standards for the American market, as well as the DIN standards for the European market.

Customers are present all over the world and have been able to confirm the professionalism and quality that characterizes KGS for years.

Korea Gas Spring es sinónimo de confiabilidad y seriedad, líder en la producción de pistones de gas. Siempre ha buscado mejorar la calidad y el servicio siguiendo las solicitudes del cliente.

Una demostración de la atención de la empresa a la calidad son la certificación ISO 9001, las normas ANSI BIFMA para el mercado estadounidense, así como las normas DIN para el mercado europeo.

Los clientes están presentes en todo el mundo y desde hace años pueden confirmar la seriedad y la calidad que distingue a KGS.

Stampaggio materie plastiche.

Il reparto di stampaggio materie plastiche Compotek è una realtà dove l'innovazione incontra la sostenibilità per offrire prodotti di alta qualità. In questo reparto, siamo equipaggiati con macchinari di ultima generazione full electric per lo stampaggio plastico a iniezione a basso consumo energetico, che ci permettono di creare prodotti resistenti e durevoli e ci consentono di garantire ai nostri clienti la massima precisione e affidabilità.

Tutti i macchinari sono in piena sinergia con l'ufficio tecnico per garantire una corretta supervisione dei

parametri di fusione e assicurare la massima qualità e quindi sicurezza del prodotto finale, il prodotto viene successivamente prelevato attraverso robot, questi si occupano di garantire una gestione veloce e ottimale del materiale garantendo ottimi standard qualitativi e una maggiore sicurezza per i nostri collaboratori.

Utilizziamo una vasta gamma di materiali per lo stampaggio, tra cui PP, PA e ABS; la maggior parte della nostra produzione è caratterizzata da materiali riciclati, che ci consentono di minimizzare l'impatto ambientale

e di creare un circolo virtuoso di sostenibilità.

Siamo orgogliosi di poter offrire soluzioni innovative e tecnologiche che soddisfano le esigenze del mercato, mantenendo allo stesso tempo l'attenzione sul rispetto dell'ambiente e delle risorse naturali.

Printing matter plastics.

Compotek's plastic molding department is a reality where innovation meets sustainability to offer high-quality products. In this department, we are equipped with brand new machinaries, fully electric for low-energy injection plastic molding, allowing us to create durable and long-lasting products and ensuring maximum precision and reliability for our customers.

All machinery is in complete synergy with the technical office to ensure proper supervision of melting parameters and to guarantee maximum quality and, therefore, safety of the final

product. The product is subsequently removed through robots, which ensure fast and optimal material management, ensuring excellent quality standards and greater safety for our collaborators.

We use a wide range of materials for molding, including PP, PA, and ABS. Most of our production is characterized by recycled materials, allowing us to minimize environmental impact and create a virtuous circle of sustainability.

We are proud to offer innovative and technological solutions that meet market needs while maintaining a

focus on respect for the environment and natural resources.

Impresión asunto plástica.

El departamento de moldeo de materiales plásticos de Compotek es una realidad donde la innovación se encuentra con la sostenibilidad para ofrecer productos de alta calidad. En este departamento, estamos equipados con maquinarias de última generación totalmente eléctricas para el moldeo plástico por inyección de bajo consumo energético, lo que nos permite crear productos resistentes y duraderos y nos permite

Reparto di curvatura tubi.

Il nuovo reparto di curvatura tubi di Compotek utilizza le migliori tecnologie e tecniche nella produzione di telai a 4 gambe, cantilever, slitte in tondino e braccioli in acciaio in modo da dare ai suoi clienti un servizio a 360° anche su richieste immediate. I nostri tecnici utilizzano coils in acciaio per la produzione di slitte personalizzate di diverse dimensioni e forme, utilizzando la piegatura a matrice per garantire la massima qualità.

te garantizar a nuestros clientes la máxima precisión y fiabilidad.

Todas las maquinarias están en completa sintonía con la oficina técnica para garantizar una supervisión correcta de los parámetros de fusión y asegurar la máxima calidad y, por lo tanto, seguridad del producto final. Posteriormente, el producto es retirado a través de robots, quienes se encargan de garantizar una gestión rápida y óptima del material, asegurando excelentes estándares de calidad y una mayor seguridad para nuestros colaboradores.

Utilizamos una amplia gama de materiales para el moldeo, incluyendo PP,

PA y ABS. La mayoría de nuestra producción se caracteriza por materiales reciclados, lo que nos permite minimizar el impacto ambiental y crear un círculo virtuoso de sostenibilidad.

Estamos orgullosos de poder ofrecer soluciones innovadoras y tecnológicas que satisfacen las necesidades del mercado, manteniendo al mismo tiempo la atención en el respeto al medio ambiente y los recursos naturales.

I telai grezzi vengono in seguito inviati nei nostri reparti di foratura, passano poi alla fase di saldatura, e per completare il ciclo vengono vernicate o cromate.

Utilizziamo solo materiali di alta qualità e controlliamo costantemente la conformità delle nostre produzioni grazie ai nostri operatori qualificati.

Il nostro reparto di piegatura tubi è sinónimo di precisione, eficiencia e completezza, e permite a Compotek di desarrollar e sostener un rapporto a 360° con i suoi clienti.

Department of curvature pipes.

Compotek's new tube bending department uses the best technologies and techniques in the production of 4-legged frames, cantilevers, round rod sliders, and steel arms to provide its customers with a 360-degree service, even on immediate requests. Our technicians use steel coils for the production of custom sliders of different sizes and shapes, using matrix bending to ensure maximum quality. The raw frames are then sent to our drilling departments, pass to

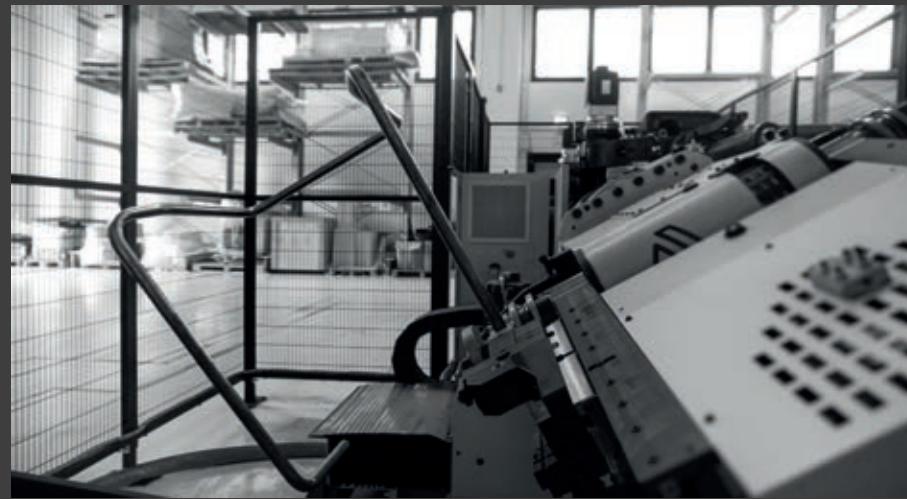

the welding phase, and to complete the cycle, they are painted or chromed.

We only use high-quality materials and constantly control the conformity of our productions thanks to our qualified operators. Our tube bending department is synonymous with precision, efficiency, and completeness, and allows Compotek to develop and maintain a 360-degree relationship with its customers.

Departamento de curvatura tubería.

El nuevo departamento de curvado de tubos de Compotek utiliza las mejores tecnologías y técnicas en la producción de marcos de cuatro patas, voladizos, varillas deslizantes y brazos de acero para ofrecer a sus clientes un servicio completo incluso en solicitudes inmediatas.

Nuestros técnicos utilizan bobinas de acero para la producción de varillas personalizadas de diferentes tamaños y formas, utilizando la curvatura de matriz para garantizar la máxima calidad. Los marcos en bruto se envían luego a nuestros departamentos de perforación, pasan a

la fase de soldadura y para completar el ciclo, se pintan o croman.

Solo utilizamos materiales de alta calidad y controlamos constantemente la conformidad de nuestras producciones gracias a nuestros operadores calificados. Nuestro departamento de curvado de tubos es sinónimo de precisión, eficiencia y completitud, y permite a Compotek desarrollar y mantener una relación completa con sus clientes.

POMPE A GAS / GAS LIFTS / ELEVADORES DE GAS

Clean Cylinder
Clean & Color Innovation

Clean Cylinder / Clean Cylinder / Clean Cylinder

Una idea innovativa nel mondo della produzione di alzate a gas, che porta anche in questo mondo il design e la personalizzazione.

Grazie alla tecnologia "Clean Cylinder" infatti è possibile avere le pompe a gas con qualsiasi colore di finitura. Inoltre grazie ad un sistema brevettato lo stelo resta sempre pulito e libero dal grasso.

An innovative idea in the world of gas lift production, which also brings design and customization to this world.

Thanks to the "Clean Cylinder" technology it is possible to have gas pumps with any finishing color. Moreover, thanks to a patented system, the stem always remains clean and free from grease.

Una idea innovadora en el mundo de la producción de elevadores de gas, que también trae el diseño y la personalización a este mundo.

Gracias a la tecnología "Clean Cylinder", es posible obtener bombas de gas con cualquier color de acabado. Además, gracias a un sistema patentado, el vástagos siempre permanece limpio y libre de grasa.

technical information

Apertura minima supporto / Minimum support opening / Apertura mínima de apoyo

*Apertura massima supporto / Maximum support opening / Apertura máxima de apoyo

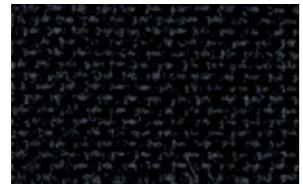

* Le dimensioni di apertura massima dipendono dalla lunghezza delle viti fornite.
Per aumentare l'apertura è possibile utilizzare viti più lunghe.
Maximum opening size depends on the length of the screws supplied.
Longer screws can be used to increase the opening.
Las dimensiones máximas de apertura dependen de la anchura de los tornillos proporcionados.
Se pueden usar tornillos más largos para aumentar la apertura.
